

The Neighborhood Christian Clinic

Restoring Health & Restoring Lives

New Patient Information

Overview & Mission

Each year the Clinic performs thousands of primary and specialty medical and dental visits, dispenses medications, provides on-site laboratory testing and ultrasound examinations, offers low-cost referrals to radiology centers and volunteer subspecialists in our volunteer network, provides comprehensive diabetic care, and maintains on-site specialty clinics in dermatology, gynecology, physical therapy, chiropractic care and more.

Organized by a group of volunteer healthcare professionals, we exist simply to:

- To provide medical and dental healthcare services to the uninsured, underserved community
- To share the Gospel and love of Jesus Christ with interested patients and colleagues
- To train and equip healthcare professionals to respectfully share the Gospel and love of Jesus Christ in their daily practice

Eligibility

Any individual who does not have health insurance (medical or dental); or who does not qualify for AHCCCS is eligible for treatment at the Clinic

First Time Patients

Instead of making appointments, first time patients seeking medical care that are in the waiting area at the times indicated in the "Hours of Operation" will receive a numbered ticket for a random drawing. Based on the number of providers available that day, a certain number of "walk-ins" may be accepted thru the drawing, although no visit is guaranteed. Those whose ticket is not drawn will know immediately that they will not be seen and advised to come back at another time/day or to seek care at another clinic. Information for other low cost clinics can be received from reception staff.

Dental

The dental clinic has limited availability and is not able to accept walk-in patients. They are only able to accept established patients who are referred by the medical clinic. To become an established patient of the medical clinic you must have had 10 medical visits. The medical clinic is able to mitigate pain or infection issues prior to referring anyone to the dental clinic.

Clinic Fees

The Clinic is able to provide medical services at an extremely low cost to the patient because of donations and the support of volunteer healthcare professionals. Because of this, the Clinic is able to provide a visit with a healthcare provider, on site lab testing and procedures as well as most medications at no additional charge to the patient.

Fee	Amount
Initial Visit and on-site specialists	\$40 (includes most medications)
Follow-up Visits	\$30
2nd Family Member (same day)	\$20 (\$30 for initial visit)
Medication Refill Admin Fee In	\$20
Chiropractic Visit	\$10
